

Constant Force Balance System  
for 1/2" Windows

Covered by one or more of the following patents & patents pending, found at  
<http://www.springcompany.com/downloads>

# Balance Installation of Inverted Configuration Without Utilizing Clip

Note: In order to utilize this method of assembly, you must first determine if your jamb  
extrusion can accept screws being driven on a 45° angle without compromising the jamb.

**EXAMPLE**  
Extrusion allowing  
for screw to be  
driven in corner

**STEP 1**  
Locate balance  
assembly in jamb

**STEP 2**  
Fasten spring with  
one #8 screw driven,  
thru spring hole,  
diagonally into corner  
of jamb pocket
